Guidance:

This is a sample risk assessment and will remain so unless the following criteria are satisfied:

1. The boxes highlighted in grey above must be completed with the required details.

The control measures in the risk assessment section must be either complied with or altered to reflect the establishment's control measures.
 Once criteria 1 - 2 have been satisfied, you should remove 'SAMPLE' from the Title.

The purpose of this whole assessment is to assist in the management of Covid 19 on schools premises and as such the over-arching hazards being controlled are building safety, reducing the spread and likelihood of contracting Covid 19, cross contamination risks and managing staff and pupil wellbeing. In all cases the persons who could be harmed will be pupils, staff, visitors and parents/ carers. Therefore, the format of the risk assessment has been altered to reflect this and present the control measures that may assist in planning for the safe operation of the school in whichever form that takes.

It is recommended that the information school holds regarding pupils allergies / intolerances is cross checked with catering staff to ensure the correct / up to date information is available for both parties as schools return in September and catering arrangements may have changed.  | Normal procedures to continue        | HT                           | 23/07/2021 |
|--|-----|--|--------------------------------------|------------------------------|------------|
| 4.Information to pupils,<br>staff, parents / carers, | 4.1 | Clear communication with parents / carers is essential from the school and the LA so<br>they understand what schools can offer safely to their children and the amended<br>control measures in place. This should include informing parents / carers about any<br>LFD testing programmes being undertaken in school for their children and the access<br>to home testing kits for parents / carers. https://www.nhs.uk/conditions/coronavirus-<br>covid-19/testing/regular-rapid-coronavirus-tests-if-you-do-not-have-symptoms/  |                                      | HT                           | 23/07/2021 |
|  | 4.2 | All persons likely to come onto the school grounds must be informed they must not attend if they are displaying any symptoms of Covid-19, if they are self isolating or if they are required to quarantine. They should also be informed they will be asked to take a LFD test before entering the school building.  |                                      | HT                           | 12.12.2021 |
| visitors and contractors.                            | 4.3 | This may be by newsletters, letters, emails, signs etc<br>Update behaviour and staff policies to reflect the new rules and routines necessary to<br>reduce risk in your setting and agree how to communicate this to staff, pupils and<br>parents. The behaviour policy should include steps to be taken if pupils fail to follow<br>the new rules and routines or deliberately put themselves or others at risk e.g.<br>deliberately coughing or spitting on another person. Both staff and pupil policies may<br>include the steps that could be taken if government guidance on self isolating outside<br>of the school is not being followed and this places other persons in the school at<br>increased risk. | Noted<br>Noted / previously ammended | HT / Office staff<br>HT / IM | 23/07/2021 |

# Managing Covid 19 in Schools from September 2021 - Risk Assessment - V6.07- Section 2 Ongoing procedures and practices subject to regular review and change

| Area of control  | Control Measures  | Additional / altered measures / notes                 | Implemented by : Initial | Date Complete |
|--|---|---|--------------------------|---------------|
|  | Clinically Extremely Vulnerable persons, Clinically Vulnerable persons, and<br>5.1 staff at higher risk (BAME, staff over 60, persons living with CEV / CV people).   | All catergory 3 staff to be risk assessed carried out | Office Manager (OM)      | 12/11/20      |
|  | <ul> <li>Staff - From 1st April 2021 CEV staff were no longer advised to shield and could return to the workplace. Employee risk assessments e.g. WASPs must be reviewer for all Clinically Extremely Vulnerable staff before they return to the workplace in September to ensure it is as safe as possible. This should include considering i additional control measures are required. For example : <ul> <li>o can certain activities / tasks be carried out at home to reduce time on site ?</li> <li>o can a lower risk role be carried out for all / some of the time ?</li> <li>o travelling at non peak times if using public transport,</li> <li>o face masks / face shields / Perspex screens in class,</li> <li>o additional PPE such as aprons / gloves.</li> </ul> </li> <li>Schools can seek advice from Occupational Health if there has been a significan change in an individual's health and medical advice is required. The progress of th vaccination programme, along with LFD testing programmes in schools, for parents carers, for household members of school staff and in other workplaces, are al additional control measures that are now in place. This should be reflected in the individual risk assessment. It is recommended staff are encouraged to take part in th vaccination and LFD testing programmes if they are able to.</li> <li>Pupils - it remains the case that pupils who remain in the clinically extremely vulnerable group could return to school from 1st April 2021 unless they were unde paediatric or NHS care (such as recent transplant or very immunosuppressed children) and have been advised specifically by their GP or clinician not to attend a education setting. IPRAs must be reviewed for all CEV pupils returning to school is September to ensure it is as safe as possible. Pregnant Staff and Pupils - Studie from the UK show that pregnant persons are no more likely to get COVID-19 that other healthy adults, but they are at slightly increased risk of becoming severely unwell if they do catch COVID-19, and are more likely to have pregnancy</li></ul> | Staff informed as necessary                           | HT / OM                  | 12.09.21      |
| Clinically extremely vulnerable<br>and vulnerable staff and pupils | <ul> <li>Some pupils or staff who are no longer required to shield, but are still generally under the care of a specialist health professional may need to discuss their care with their health professional before returning to school in September (usually at their next planned clinical appointment). Any advice must be considered in an IPRA or WASP Schools can seek advice from Occupational Health if there has been a significant change in an individual's health and medical advice is required. If there are unvaccinated clinically vulnerable pupils and students within your setting, following the identification of a close contact, you may wish to put in place temporary additional protective measures whilst waiting for the outcome of any PCR test. These could include the identified close contact wearing a face covering (unless exempt), limiting contact and mixing with those identified as a close contact should also continue to engage with regular LFD testing if they are able. Any decision to take additional precautions should be based on the specific circumstances of the individual close contact and the clinically vulnerable children and young people within the setting, and you should weigh up what impact additional precautions may have or education and wellbeing. No pupil or student should be denied education based or their compliance with any additional precautions.</li> </ul>   | Noted office made aware                               | HT / OM                  | 12.12.2021    |

|  | 5.1.3 | All staff should follow the measures set out in the system of controls in this risk assessment to minimise the risks of transmission. This includes continuing to observe good hand and respiratory hygiene. CEV, CV and staff at higher risk should take particular care to practise frequent, thorough hand washing, and cleaning of frequently touched areas in their home and/or workspace. <b>Home working</b> - The DfE schools guidance says that: "The government is no longer advising people to work from home if they can" Staff that have been working from home following the advice issued last term can now return to school. If those individuals are at greater risk from covid i.e previously CEV / CV they should have an individual risk assessment carried out / their current risk assessment reviewed before returning. | Noted and ammended   | HT                     | 24.01.22   |
|--|-------|--|--|------------------------|------------|
|  | 5.1.4 | Staff who live with someone who is CEV / CV but who are not CEV/CV themselves, can attend work and they should ensure they maintain good prevention practice in the workplace and home settings, unless they have been advised otherwise by an individual letter from the NHS or a specialist doctor. People who live with those who may have comparatively increased risk from coronavirus (COVID-19) can attend the workplace. People who live with CEV or CV persons should have their COVID risk assessment reviewed for the return in September to see if additional control measures such as additional PPE, changing clothes / showering on return home could be put in place.  | Noted  | HT / IM                | 30/03/2021 |
|  | 6.1   | All persons who are displaying symptoms must not come into school and should follow Government guidance on self isolating including test and trace. In most cases, parents and carers will agree that a child with symptoms should not attend the setting, given the potential risk to others. If a parent or carer insists on a child attending a setting, settings can take the decision to refuse the child if, in your reasonable judgement, it is necessary to protect other children and staff from possible infection with COVID-19. Decisions need to be carefully considered in light of all the circumstances and current public health advice.  | Noted<br>Clear information provided to families about<br>expectations in initial letter, newsletters and<br>signage  | HT / Site manager (SM) | 29/05/2020 |
| 6.Persons who are already<br>displaying Coronavirus symptoms | 6.2   | Routine vaccinations may cause a mild fever in children. This is a common and expected reaction, and isolation is not required unless COVID-19 is suspected. Whilst teething can cause some known side effects such as flushed cheeks and sore gums, NHS guidelines state that fever is not a symptom of teething. If COVID-19 is suspected the child should start isolating and get tested.   |  | HT                     | 23/07/2021 |
|  | 6.3   | Persons whose family members are displaying symptoms of Coronavirus must follow<br>Government guidance regarding self isolating including test and trace.  | expectations in initial letter, newsletters and<br>signage<br>Clear communication lines for staff<br>concerned that this might apply to them.<br>Contact HT / DA in the normal way | HT / SM                | 29/05/2020 |
|  | 7.1   | All persons who develop Coronavirus symptoms in between attendance times or<br>whilst on site, should follow the latest government guidance on self-isolating including<br>any isolation periods and test and trace. Staff or pupils on site when they develop<br>symptoms should be sent home as soon as possible. All staff and pupils who are<br>attending an education or childcare setting will have access to a test if they display<br>symptoms of coronavirus. Settings have been provided with a small number of home<br>testing kits that they can give directly to parents/carers collecting a pupil or to staff<br>members who have developed symptoms at their setting where they think providing<br>one will significantly increase the likelihood of them getting tested. Advice will be<br>provided alongside these kits.      | If school testing kits are available, staff or<br>pupils supported to self-test prior to leaving<br>the school grounds   | ΗT                     | 05.01.2022 |

| - |   |      |  |   |   |
|---|---|------|--|---|---|
|   |   | 7.2  | safe to do so. Pupils will need to be supervised whilst this takes place. A window<br>should be opened for fresh air ventilation if possible. Consider if you can set aside a<br>separate room to be available for potential isolation of staff and pupils. If it is not<br>possible to isolate them, move them to an area which is at least 2 metres away from<br>other people.   | Family room 1 allocated for this purpose<br>This will be family room 1 by the main office<br>or weather permits outside in supervised but<br>fresh air<br>The child will be removed ASAP -<br>professional judgement must be used<br>regarding the safe movement of the child as<br>ever using external routes wherever possible<br>Any siblings will be removed from their<br>bubbles and quarantined away from the<br>suspected case but away from all others if<br>not showing signs.<br>SMT to support maintenace of 2M distance<br>where possible. | HT / SM                                     |
|   |   | 7.3  | An IIR face mask should be worn by the supervising adult if a distance of 2 metres cannot be maintained. If contact with the child or young person is necessary, then gloves, an apron and a IIR face mask should be worn by the supervising adult. If a risk assessment determines that there is a risk of splashing to the eyes, for example from coughing, spitting, or vomiting, then eye protection should also be worn.  | same  |   |
|   |   | 7.4  | they can return to their setting and any fellow household members who are not  | Noted<br>Clear information to be provided to families /<br>parents / carers   | HT / OM                                     |
|   | 7.Persons developing Coronavirus<br>symptoms who have been on site<br>previously or persons who develop | 7.5  | Where a child, young person or staff member tests <b>positive or the thresholds in the</b><br><b>Outbreak Management Plan are reached</b> , you can contact the DfE helpline for<br>advice around what action should be taken. Inform DCS Alert using form PCIF 01.  | Amended and Noted   | HT / OM                                     |
|   | symptoms whilst on site   | 7.6  | There should be a school specific outbreak management plan in place, relevant staff should be aware of the thresholds for potential outbreaks and should be monitoring positive cases in the school. If settings think they may have an outbreak they should contact the DfE Helpline on 0800 046 8687 and select option 1 for advice on the action to take. In some cases, measures such as re-introducing bubbles, masks and social distancing may be recommended. In addition schools may be contacted by the Local Health Protection Team and / or LCC HSWT if their records indicate there may be an outbreak. Inform DCS Alert using form PCIF 01. | Outbreak management plan in place<br>Noted and amended  | Senior Leadership Team<br>(SLT) / OM        |
|   |   | 7.7  | If a member of staff has helped someone who was unwell with Covid symptoms they do not need to go home unless they develop symptoms themselves or they receive notification to self isolate as a close contact. They should wash their hands thoroughly for 20 seconds after any contact with someone who is unwell.   | Clear information is provided to staff  | HT  |
|   |   | 7.8  |  | The childs space is cleaned whilst the<br>remainder of the bubble are removed<br>temporarily from the room. Staff with<br>appropariate PPE can do this (apron /<br>gloves/ warm water) IIR is available in the<br>ICT suite should it be required.  | SLT / SM                                    |
|   |   | 7.9  | A separate sanitary facility should be provided for individuals who display symptoms.<br>These should be cleaned and disinfected using standard cleaning products before<br>being used by anyone else as should any areas they are isolated in.  | The seperate sanitary facility is the disabled toilet at the front of the school  | DH to liaise with CH about whom is to order |
|   |   | 7.10 | be used to move a group to where a member of that group has displayed symptoms.<br>This may enable cleaning and disinfection of the potentially contaminated area.   | We do not have the capacity for an INSIDE<br>sterile spoace - please use OUTSIDE areas<br>as an alternative or if in wet weather use the<br>DINING HALL   | SMT   |
|   |   | 7.11 | UK Health and Safety Agency (UKHSA) is clear that routinely taking the temperature of pupils is not recommended as this is an unreliable method for identifying coronavirus (COVID-19).  | Amended   | HT  |

|   | 11.8   | Test and Trace guidance, some frequently asked questions and answers and a template letter for settings to send to parents, pupils and students on changes to contact tracing of close contacts have been provided by the DfE and can be found on the document sharing platforms for primary and early years, secondary schools, further education and higher education and children's social care. In addition LCC has produced a sample letter schools can use to inform parents / carers of positive cases in their child's class / year group.  |  |         |
|---|--------|---|--|---------|
| 12.First Aid  | 12.1   | Ensure adequate first aid provision for the numbers of staff and pupils on site, this is likely to include staff with Full FAW qualifications and paediatric first aiders for early years settings.   | Staff will access appropriate PPE on a case<br>by case basis to maintain their own safety as<br>according to first aid training<br>Ready made PPE kits will be set up as<br>discrete packs and available from the ICT<br>suite |         |
|   | 12.2   | Paediatric first aiders must be available at all times that children up to the age of 5 are on site or on educational visits.   | Noted and in place   |         |
|   | 13.1   | If it is not possible to clean surfaces between each user then the use of biometrics should be replaced with an alternative non contact system where possible e.g. entry points, registration, food and drink purchasing.   | INVENTRY system accessible for visitors via<br>snaitised and personal touch screen wands<br>Staff provided with their own wand   | ОМ      |
| 42 Diamatrica Lifta electronia                                | 13.2   | Sanitisers could be used before touching biometrics if they cannot be cleaned between users.  | Sanitiser also located next to the touch screen  | OM / SM |
| 13.Biometrics, Lifts, electronic signing in / out systems and | 13.3   | Lift control panels should be cleaned between users e.g. using hand sanitisers or ant-<br>viral wipes.  | Notes and actioned   | SM      |
| control panels / buttons. Shared IT.                          | 13.4   | Multi user Electronic signing in / out systems should not be used at this current time unless they can be cleaned between users either by the use of hand sanitisers or antiviral wipes.  | See 13.1   |         |
|   | 13.5   | IT equipment should be cleaned between users if it cannot be kept for the sole use of<br>an individual.   | Continue to follow the 'If you use it - wipe it!'<br>regime. Wipes provided in class base areas<br>and in Computing suite  | SM      |
|   | 14.1   | Ventilation   |  |         |
|   | 14.1.1 | Identify any poorly ventilated spaces as part of this risk assessment and take steps to improve fresh air flow in these areas, giving particular consideration to activities such as assemblies or events where visitors such as parents are on site, for example school plays and parents evenings. A simple way to do this is : a) look for areas where people work / occupy spaces and where there is no mechanical ventilation or natural ventilation such as open windows, doors, or vents, b) check that mechanical systems provide outdoor air, temperature control, or both. If a system only recirculates air and has no outdoor air supply, the area is likely to be poorly ventilated, c) identify areas that feel stuffy or smell bad. Schools can use the CO2 monitors provided by the DfE to help identify poorly ventilated areas. Where teaching areas (and staff rooms in SEND settings) are identified as poorly ventilated and this cannot be resolved through simple measures such as opening doors and windows, or other remedial works then air cleaning units should be considered. State funded schools that met the eligibility criteria can apply for funded air cleaning units. https://drive.google.com/file/d/1K9jZhgH1fjbBvYKg2b4sjIMiVWrQK1vH/view | Noted and Site manager advised   | HT / SM |
|   | 14.1.2 |   | Staff to ensure windows are open and doors<br>are propped open to aid free air circulation<br>This to include all rooms that are used - eg<br>breakfast club<br>Site manager will open windows on opening<br>up                | SM      |
|   | 14.1.3 | Where possible open windows to classrooms, offices, staff rooms etc. In cooler weather windows should be opened just enough to provide constant background ventilation, and opened more fully during breaks to purge the air in the space. As social distancing, mask wearing and bubbles are no longer in place, consider if corridors and other communal areas where staff and pupils may congregate temporarily can be ventilated.   | Noted<br>Reminder to be shared with staff at<br>Spetember briefing   | HT / SM |

|------------------------------|---|---|----------------------------|---------------------------------------|
| 14.1<br>14. General controls | <ul> <li>centralised ventilation system that removes and circulates air to different rooms it is recommended that you turn off recirculation and use a fresh air supply. Air conditioning systems that mix some of the extracted air with fresh air and return it to the rooms, individual room systems or portable units do not need adjusting. Ventilation to chemical stores should remain operational. Mechanical ventilation systems should be adjusted to increase the ventilation rate wherever possible, and checked to confirm that normal operation meets current guidance (if possible, systems should be adjusted to full fresh air or, if not, then systems should be operated as normal as long as they are within a single room and supplemented by an outdoor air supply. Heating systems that utilise warm air should follow the same principles. Guidance from HSE is available at https://www.hse.gov.uk/coronavirus/equipment-</li> </ul>   | Noted - applicable in Y3A and ICT /<br>computing suite  | HT / SM                    | 04/11/2020                            |
|                              | <ul> <li>and-machinery/air-conditioning-and-ventilation.htm.</li> <li>To balance the need for increased ventilation while maintaining a comfortable temperature, the following measures should also be used as appropriate: a) opening high level windows in preference to low level to reduce draughts, b) purging or airing rooms by opening all the doors and windows fully to maximise the ventilation in a room when they are unoccupied (e.g. between classes, during break and lunch, when a room is unused), c) seeing if there are trickle vents that can be opened, d) providing flexibility to allow additional, suitable indoor clothing, e) rearranging furniture where possible to avoid direct drafts. Lower temperatures and windy weather conditions in the winter months will increase natural ventilation through openings. This means windows and doors do not need to be open as wide. Increased ventilation may make school buildings cooler than usual over the winter months. Consider allowing additional, suitable indoor items of clothing to be worn during the winter period in addition to the school's current uniform. Where this occurs, schools should ensure that no extra financial pressure is placed on parents.</li> </ul> | Noted and implemented as applicable   | HT / SM                    | 04/11/2020                            |

|------------------------------|--------|--|---------------------------------------|--------------------------|--------------------------|
|                              |        | removing difficult to clean items. Consider how soft furnishings can be cleaned and<br>ensure this is carried out on a regular basis. Equipment that is kept for the sole use of<br>a discreet group of staff and pupils can be cleaned at the end of the day. Settings will<br>need to make an assessment of the cleanability of equipment used in the delivery of<br>therapies (for example. physiotherapy equipment, sensory equipment), to determine<br>whether this equipment can withstand cleaning and disinfection between each use<br>(and how easy or practical it would be to do so) before it is put back into general use.<br>Where cleaning or disinfection is not possible or practical, resources will have to be<br>restricted to one user, or be left unused for a period of 48 hours (72 hours for plastics)<br>between use by different individuals. The exception to this would be a piece of<br>equipment such as a weighted blanket that is required for a specific sensory need.<br>The risks generated by removing this support could potentially be greater than the risk<br>of infection. Such equipment should remain solely for the use of a limited number of<br>pupils and be washed at the end of every day. | Noted                                 | HT / SM<br>HT / SM       | 26.07.21                 |
|                              | 31.4   |  | Noted                                 | HT / SM / EYFSL /        | 26.07.21                 |
| 31. Shared Resources / Areas | 31.5   | <b>Classroom resources</b> - For individual and very frequently used equipment, such as pencils and pens, it is recommended that staff and pupils have their own items that are not shared. Classroom based resources, such as books and games, can be used and shared and these should be cleaned regularly, along with all frequently touched surfaces. Pupils and teachers can take books and other shared resources home, although unnecessary sharing should be avoided, especially where this does not contribute to pupil education and development. Similar rules on hand cleaning, cleaning of the resources and rotation should apply to these resources.  | Noted                                 | HT / SM                  | 26.07.21                 |
|                              | 31.6   | <b>Early Years</b> - Shared materials and surfaces should be cleaned and disinfected more frequently. Malleable materials for messy play (for example sand/water/mud) must be able to be used and cleaned - including being replaced - regularly in accordance with the manufacturer's instructions, where applicable. Children and staff should wash their hands thoroughly before and after messy play. Frequently touched surfaces, equipment, tools and resources for messy play should be thoroughly cleaned and dried before they are used by a different group.   | Noted                                 | HT / SM / EYFSL /        | 26.07.21                 |
|                              | 31.7   | Pupils can take resources e.g. library books, home as long as they are quarantined for 48 hours (72 if plastic) on their return if they cannot be cleaned.   | Noted - continue with current systems | HT / Literacy Leads (LL) | 26.07.21                 |

|                              |       | they do not have symptoms of Covid-19.   |  |                             |               |  |  |  |  |
|                              |       | Identify the number of testing bays and testing personnel likely to be needed. Use the data  |  |                             |               |  |  |  |  |
|                              | 1.1.2 | obtained from step 1.1.1 in the workplace toolkit. This can then be used to identify the personnel and space required for a testing area.  |  |                             |               |  |  |  |  |
|                              |       | Identify appropriate staff / volunteers to carry out the roles required. Consideration should be   |  |                             | 1             |  |  |  |  |
|                              | 1.1.3 | given to their suitability for the role e.g. underlying health conditions, vulnerable family   |  |                             |               |  |  |  |  |
|                              |       | members.   |  |                             |               |  |  |  |  |
|                              | 1.1.4 | Staffing levels should be sufficient to allow breaks for staff and to reduce risk of errors due to fatigue.  |  |                             |               |  |  |  |  |
|                              |       | Identify 1 / more than 1 suitable dedicated testing area(s) in the school. Testing areas require :   |  |                             |               |  |  |  |  |
|                              |       |  |  |                             |               |  |  |  |  |
|                              |       | a. Adequate space to follow the layout requirements for the testing areas, bays each bay and   |  |                             |               |  |  |  |  |
|                              |       | associated support stations in the " How to Guide ". This includes allowing for safe movement  |  |                             |               |  |  |  |  |
|                              |       | between registration desks, testing bays, a one way system, entry and exit points and a socially distanced waiting area (if required). You may be able to use a space adjacent to and    |  |                             |               |  |  |  |  |
|                              |       | connected to the testing area for the registration desk.   |  |                             |               |  |  |  |  |
|                              | 1.1.5 | b. Adequate ventilation (in line with Section 2 of this risk assessment) and lighting. Consider if   |  |                             |               |  |  |  |  |
|                              |       | additional task lighting is required for those processing the tests and at other stations in the   |  |                             |               |  |  |  |  |
|                              |       | testing area.  |  |                             |               |  |  |  |  |
|                              |       | c. A non porous floor and readily cleansable surfaces. Temporary floor coverings could be used e.g. installing temporary hardcovers on carpets, to facilitate cleaning.                  |  |                             |               |  |  |  |  |
|                              |       | d. Privacy - it should not be possible for passers by / staff and pupils in other areas to see   |  |                             |               |  |  |  |  |
|                              |       | persons visiting the testing area whilst they are being tested.  |  |                             |               |  |  |  |  |
|                              | 12    | Catting up the Testing Area  |  |                             |               |  |  |  |  |
|                              | 1.2   | Setting up the Testing Area.           Set up the testing area in accordance with the "How to Guide ". It is recommended bays are  |  |                             |               |  |  |  |  |
|                              |       | numbered and the bay number is written on the test kit and entered on the school records so  |  |                             |               |  |  |  |  |
|                              | 1.2.1 | that any issues with high numbers of inconclusive tests e.g. faulty batches, staff training issues   |  |                             |               |  |  |  |  |
|                              |       | can be identified and rectified.   |  |                             |               |  |  |  |  |
|                              |       | It is recommended signage and floor marking is used to identify the entrance and exit, one   |  |                             |               |  |  |  |  |
|                              | 1.2.2 | way system and the outline of the bays (if screens are not used). It is also recommended the floor is marked in front of each testing bay where the person being tested can stand whilst |  |                             |               |  |  |  |  |
|                              |       | waiting to be called forward / being given instructions.   |  |                             |               |  |  |  |  |
|                              | 1.2.3 | Testing bays should be set up and provided with the facilities outlined in the How to Guide.   |  |                             |               |  |  |  |  |

|                              |        | Suitable seating should be available if persons taking the tests need to or wish to do the test  |  |  |
|------------------------------|--------|--|--|--|
|                              | 1.2.4  | in a seated position. Any seating provided must be readily cleansable and be cleaned before  |  |  |
|                              |        | and after each use.  |  |  |
|                              | 1.2.5  | Consider if alternative tables / facilities are required for persons in wheelchairs.   |  |  |
| ST 1. Setting Up the Testing | 1.2.6  | Fixed or standing mirrors may be easier for some persons to use whilst taking the test.  |  |  |
| Area.                        |        | Consider the potential height of users in positioning fixed mirrors.   |  |  |
|                              |        | To provide a degree of privacy to persons undertaking the test consider the use of opaque or   |  |  |
|                              |        | solid screens either side of the testing bay. Any screens used should be of adequate height /  |  |  |
|                              | 1.2.7  | size to afford privacy and must be readily cleansable. Wipeable sheeting could be used to  |  |  |
|                              |        | cover screens / dividers that you may already have in school that are not cleansable.  |  |  |
|                              |        |  |  |  |
|                              |        | Closely located toilets and wash basins for the sole use of staff working in the testing area  |  |  |
|                              | 1.2.8  | should be available. Staff using these should still follow social distancing, hand hygiene and   |  |  |
|                              |        | the 'Use it Wipe It' principle.  |  |  |
|                              |        | Depending on the time of day / length of time the testing area is in operation, a separate break   |  |  |
|                              | 1.2.9  | area for the sole use of staff working in the testing area may be needed so they do not need to  |  |  |
|                              |        | go into the main school staff rooms whilst they are involved in testing. This should be cleaned  |  |  |
|                              |        | regularly in line with the enhanced cleaning programme in school.  |  |  |
|                              |        | In addition to or instead of timers in each bay, it may useful to provide a large clock visible to   |  |  |
|                              | 1.2.10 | the processing staff to assist in the timing of the test development. Processing staff should  |  |  |
|                              |        | write the time of the test on the test vial or the LFT device.   |  |  |
|                              | 4.0.44 | It is recommended him are provided in each boy and at each station in the testing area to  |  |  |
|                              | 1.2.11 | ensure was should be unlidded or foot operated.  |  |  |

|                              | 1.2.12 |  |  |  |
|                              |        |  |  |  |
|                              |        |  |  |  |
|                              |        |  |  |  |
|                              |        |  |  |  |
|                              |        |  |  |  |
|                              |        |  |  |  |
|                              |        | Consider the use of separate containers for the sheets for test results awaiting entry onto the  |  |  |
|                              |        | DHSC log and school log and those that have already been entered. For example :  |  |  |
|                              |        |  |  |  |
|                              |        |  |  |  |
|                              |        |  |  |  |
|                              |        |  |  |  |
|                              | 1.2.13 |  |  |  |
|                              |        |  |  |  |
|                              |        |  |  |  |
|                              |        |  |  |  |
|                              |        |  |  |  |
|                              |        |  |  |  |
|                              |        |  |  |  |
|                              | 1.3    | After mass on site testing of pupils has been completed  |  |  |
|                              |        | A small on-site testing centre e.g. 1 to 3 bays, that complies with this Section and the 'How to   |  |  |
|                              |        | Guide' should be retained so that testing can be offered to pupils (and staff if relevant) who are   |  |  |
|                              | 1.3.1  | unable or unwilling to test themselves at home or who return to school after the majority of   |  |  |
|                              |        | pupils e.g. pupils who are shielding and need to undergo the 3 tests before starting home  |  |  |
|                              |        | testing.   |  |  |
|                              |        | tooting.   |  |  |

|   | 2.1 | All staff / volunteers involved in the testing process must complete the online training accessed via the schools portal for the roles they will be / are undertaking. In order to provide flexibility to the process of testing and opportunities for rotation it is recommended persons train for multiple roles e.g. registration, sample processing, data entry. Only staff who have |         |  |
|---|-----|--|---------|--|
|   |     | <ul> <li>passed the assessments should commence testing and schools/colleges are responsible for ensuring this is the case.</li> <li>Carry out several dummy runs before starting the testing for real. This will enable testing staff to gain competency / confidence before the actual testing takes place. This is especially</li> </ul>  | Amended |  |
| ST 2. Training / competency                   | 2.2 | important as the Orient Gene and other tests are carried out / processed differently to the<br>Innova tests.<br>Consider that pupils who have never swabbed before may take longer to undertake the  |         |  |
|   | 2.3 | swabbing process at first start compared to staff that are now familiar with it. This may impact<br>on how many tests can be carried out each day and the rota for pupils attending to take their<br>tests.  |         |  |
|   | 2.4 | Staff competency at their roles should be assessed at regular intervals throughout the process e.g. weekly. The checklists on the school portal could be used to assist with this. Any areas for improvement should be addressed.  |         |  |
| ST 3. Storage and                             | 3.1 | Testing kits should be stored between 2'C and 30'C and the antigen LFD devices and reagents must be between 15 °C and 30 °C during use.  |         |  |
| management of Testing                         | 3.2 | Storage areas should be lockable and access restricted to authorised personnel only.   |         |  |
| Materials / Supplies for the<br>Testing area. | 3.3 | Checks of supplies should be undertaken at the end of each session to ensure there are adequate supplies of all relevant materials for the testing area before testing commences for the next session e.g. at the end of each day for the following day.   |         |  |
| ST 4. Waste Disposal                          | 4.1 | Waste generated by the testing area can now all be disposed of as general waste your mainstream waste disposal routes. It no longer needs to go in yellow / clear or 'tiger' bags and be disposed of as healthcare waste.  |         |  |
|   | 5.1 | Staff working in the testing area must don and doff PPE in line with the guidance in the Schools and Colleges "How to Guide" available on the DfE Schools Portal.  |         |  |
|   | 5.2 | Staff working in the testing area should wear and change PPE as identified below. A session is considered to end when a worker leaves the setting i.e. at break or end of shift. New PPE should be worn for each session. In addition PPE should be changed if protective properties are compromised or contaminated from secretions.  |         |  |
|   | 5.3 | <b>Staff processing / handling the tests</b> should wear IIR masks and eye protection / face shields, disposable glove and aprons. Gloves must be changed after each test and the rest changed at the end of each session including after breaks.  |         |  |
|   | 5.4 | <b>Staff undertaking cleaning</b> of the area should wear IIR masks and eye protection / face shields, disposable gloves and aprons. This should be changed at the end of each session including breaks and immediately after cleaning up spillages.   |         |  |
| ST 5. PPE                                     | 5.5 | All other staff working in the testing area e.g. co-ordinating supplies and queuing, registering and recording should wear IIR masks at all times and use and replace these in line with Point 17. PPE in Section 2 of this RA and at the end of each session including breaks.  |         |  |
|   | 5.6 | <b>Persons taking the test</b> should wear a face mask / face covering at all times except when they are physically carrying out the test on themselves / being assisted to carry out the test.  |         |  |
|   | 5.7 | <b>Staff directly assisting persons</b> to undertake tests should wear IIR masks and eye protection / face shields, and disposable aprons and gloves These should be changed between each person being assisted.   |         |  |
|   | 5.8 | All Testing centre staff must not leave the testing area without removing and disposing of their PPE appropriately or before donning any new PPE required in areas of the school outside of the testing area.  |         |  |
|   |     | Before the Test  |         |  |
|   | 6.1 | It is recommended schools pre-register pupils who have consented to the test on the DHSC portal before they attend the testing area.   |         |  |

|                              | 11.8 | The lot numbers of the testing kits provided should be recorded on arrival.   |         |  |
| ST12. Storage and            | 12.1 | Testing kits should be stored between 2'C and 30'C.   |         |  |
| management of Testing        |      | Storage areas should be lockable and access restricted to authorised personnel only.  |         |  |
| Materials / Supplies for the |      | Checks of supplies should be regularly undertaken to ensure there are adequate supplies of all  |         |  |
| Testing area.                | 12.3 | relevant materials for the testing to be undertaken and stocks re-ordered as required.  |         |  |
| resting area.                | 42.4 |   | Amended |  |
|                              | 13.1 | Staff and pupils are expected to sign for the receipt of their test kits.   | Amended |  |
|                              |      | If you have regular contracted staff, therapists, volunteers on site e.g. cleaners and caterers,  |         |  |
|                              |      | peripatetic teachers etc you could include them in your testing offer if the amount of kits you   |         |  |
|                              | 13.2 | have been provided with allows for this. This would need to be done in consultation with the  |         |  |
|                              | 10.2 | contractors / managers and test results would need to be shared between both parties. Those   |         |  |
|                              |      | persons would be expected to follow the same procedures as your own staff.  |         |  |
|                              |      |   |         |  |
|                              | 13.3 | All staff and pupils consenting to testing should test twice a week as the tests work best when   |         |  |
|                              | 13.3 | there is a high viral load. This will apply to part time and full time staff.   |         |  |
|                              |      | It is recommended staff and pupils are given time slots for the collection of their test kits to  | Amended |  |
| ST 13. Issuing tests         |      | avoid people congregating in the area. You may wish to allocate staff to deliver the testing kits   |         |  |
|                              | 13.4 | to staff in areas where they are based and pupils directly during the registration process in   |         |  |
|                              | -    | classrooms. Staff distributing / collecting test kits must hand sanitise before / after handling  |         |  |
|                              |      | kits.   |         |  |
|                              |      |   |         |  |
|                              | 13.5 | When issuing test kits the issuer must complete the test kit log - see record keeping below.  |         |  |
|                              |      |   |         |  |
|                              |      | Test kits should be issued with the most up to date Instructions for Use leaflet (at this current   |         |  |
|                              | 13.6 | time test kits may not have the most up to instructions included). It is recommended staff and  |         |  |
|                              | 10.0 | pupils are also sent a copy of this electronically and it is placed on the schools internal system  |         |  |
|                              |      | (if there is one) so staff and pupils can still access the instructions if they loose the leaflet.  |         |  |
|                              |      | When testing at home, pupils aged 18 and over should self-test and report the result, with  |         |  |
|                              |      | assistance if needed. Pupils aged 12-17 should self-test and report with adult supervision. The   |         |  |
|                              | 14.1 |   |         |  |
|                              |      | adult may conduct the test if necessary. When testing at home children aged 11 (who attend a  |         |  |
|                              |      | secondary school) should be tested/swabbed by an adult.<br>Tests should be taken twice a week at intervals of 3 or 4 days apart e.g. Sunday and |         |  |
|                              |      |   |         |  |
|                              |      | Wednesday or Thursday. Consider identifying set days for staff and pupils to undertake their  |         |  |
|                              | 14.2 | tests. It is recommended one of the days is the first day they are in school each week / the  |         |  |
|                              |      | day before. This may mean the same set day for all staff or different set days depending on   |         |  |
|                              |      | the working patterns of staff.  |         |  |
|                              |      | Consider the time consenting staff and pupils will take the test. This may be : a) in the   | Amended |  |
|                              |      | morning to minimise the chance of being exposed to Covid after taking the test or (b) late  |         |  |
|                              | 14.3 | afternoon / evening to enable time for the school to take action to manage absences in the  |         |  |
|                              |      | event of a positive result, and for staff and pupils to have the time to re-take a test if they get   |         |  |
|                              |      | void results.   |         |  |
|                              |      | Staff and pupils that have had a positive PCR test in the last 90 days are now advised to take  | Amended |  |
|                              |      | part in twice weekly LFD tests within the 90 day period after the PCR test but should not re-   |         |  |
|                              | 44.4 | commence taking part until day 28. Staff and pupils that have had the Covid-19 vaccine can  |         |  |
|                              | 14.4 | still take part in the LFT programme. Due to the Omicron varient staff and pupils who who   |         |  |
|                              |      | have had a positive PCR test in the last 90 days are now advised to take part in daily testing if   |         |  |
|                              |      | required as a close contact.  |         |  |
|                              |      |   |         |  |
|                              |      | The LFD test kits should be stored between 2'C and 30'C. However the devices and reagents   |         |  |
|                              | 14.5 | must be used between 15 °C and 30 °C during use so if they are stored somewhere colder than   |         |  |
|                              |      | 15 °C they should be moved to a room temperature area for around 30 minutes before use.   |         |  |
|                              |      |   |         |  |

|   |  | Staff and pupils should : a) wait at least 30 minutes after eating or drinking anything before  |         |  |
|---|--|---|---------|--|
| ST14. Conducting the Tests  |  | starting the test.  |         |  |
| of 14. Conducting the roots   |  | b) Not start their test if they have had a nosebleed in the last 24 hours - if this is the case they  |         |  |
|   |  | should inform the school and take a test when the 24 hours has elapsed if possible bearing in   |         |  |
|   | n  | nind the need to take the 2 tests 3 / 4 days apart. If only one nostril has bled they can swab  |         |  |
|   |  | he other one.   |         |  |
|   | C  | c) Swab the other nostril if they have a nose piercing or, if both nostrils are pierced, remove   |         |  |
| 14.   | . <b>6</b> t   | he jewellery first.   |         |  |
|   | c  | I) Swab both nostrils if they cannot take a throat swab e.g. they have had a tracheostomy or  |         |  |
|   |  | wab the throat if they cannot do nose swabs.  |         |  |
|   |  | e) Wash their hands or hand sanitise before taking the test.  |         |  |
|   |  | ) Use a clean, flat surface and, if doing more than one test, make sure they sanitise their   |         |  |
|   |  | nands each time.  |         |  |
|   |  | g) Time the test and check their results at the 30 minute point as tests results are invalid if left  |         |  |
|   | 1-   | any longer.   |         |  |
|   |  | f a test result is Inconclusive / Void the individual should take another LFD test as soon as   |         |  |
| 14.   |  | possible using a new test kit but not reusing anything from the first kit. If both tests are void the   |         |  |
| 14.   |  |   |         |  |
|   |  | nember of staff or pupil should arrange to have a PCR test.   |         |  |
|   |  | The testing solution is not toxic in the quantities provided and any spillages should be cleaned  |         |  |
| 14.   |  | with a paper towel. If the solution included the throat and nose sample, the area should be   |         |  |
|   |  | appropriately disinfected using household disinfectant.   |         |  |
|   |  | As soon as possible after a positive or negative result staff and pupils should upload their  |         |  |
| 14.   |  | esults to the NHS online at www.gov.uk/report-covid19-result or by contacting 119. They   |         |  |
|   |  | nust also inform the school via the identified route / at the identified time.  |         |  |
|   |  | Staff and pupils should report any issues with testing to the school e.g. unable to take the test,  |         |  |
| 14.   |  | nissing / broken / damaged items, unable to log results with NHS, void results. The school  |         |  |
| 17.   | ' <b>'</b>  c  | can monitor and / or then raise this with DfE helpline or 119 as identified in the How to Guide.  |         |  |
|   |  |   |         |  |
|   |  | <b>Positive result</b> - individual and their household if not exempt should start self isolation straight  |         |  |
| 15.   |  | away. Close contacts who are exempt from isolation are strongly advised to carry out daily  |         |  |
|   | L  | FD tests for 7 days (unless under 5).   | Amended |  |
| 15.   | .2 📘   | VHS Test and Trace will undertake any close contact tracing.  | Amended |  |

| Primary and School Nursery<br>eeds for Learning Health, s                   |     | s - currently limited to twice weekly staff home tests. Guidance and Resour<br>d Wellbeing Home page.   | ces are available on the Primary School F           | Portal - a link is ava | ailable on the               |  |  |  |  |
| 1. Organising the testing system  | 1.1 | Staff should be provided with the school amended letter for staff and privacy notice (on the Primary schools portal), information leaflet, time to watch the how to test video and access to the relevant materials on the primary schools portal to enable them to make an informed decision regarding consent for weekly testingIt is recommended this is done as a group in staff meetings to give a consistent message and it could be done via a virtual staff meeting with time during / after fro staff to ask questions / raise any issues or concerns. | DfE template letter to be used plus privacy noticeS |                        | 29.01.2021                   |  |  |  |  |
|   | 1.2 | Staff should be informed that if they consent to testing they must carry out the testing at the time agreed with the school, follow the instructions in the test kit, must not give the test kits to anyone else and must upload their results and inform the school as soon as possible  | Sunday evening and Wednesday eveningInform          | нт                     | 29.01.2021                   |  |  |  |  |
|   | 1.3 | Identify and record which staff have given consent to carry out twice weekly testing. Staff should be encouraged to undertake testing as it is an additional control measure on top of those already in place, however, consent is voluntary and can be withdrawn by the individual at any time and they should not be directed to or forced to take the tests. Staff attending school who do not consent to the test can still attend school as normal if they do not have symptoms of Coved - 19.   | Information collated for 66 staff, 55 currently ut  |                        | 25.01.2021                   |  |  |  |  |
|   | 1.4 | Set up a system of recording the distribution of test packs and the results of testing carried out.   |   | нт                     | 29.01.2021                   |  |  |  |  |

| ]  |     | Cot up a collection point in achoral for the distribution of the test peaks, this should be able to   |   |          |                    |
|--|-----|---|---|----------|--------------------|
|  | 1.7 | Set up a collection point in school for the distribution of the test packs - this should be able to be secured to prevent unauthorised access e.g. the staff room. The temperature of the area should be between 2'C and 30'C. For schools with a screened reception desk with a secure office space this may be a suitable option so kits can be handed out via the screen.  | HALL - timetable for collection<br>Storgage in locked uniform cupboard  |          |                    |
|  |     |   |   | HT / DA  | 25.01.2021         |
|  | 1.8 | The lot numbers of the testing kits provided should be recorded on arrival.   | Noted and to be completed   | DA       | 25.01.2021         |
| PT 2. Storage and management<br>of Testing Materials / Supplies<br>for the Testing area. | 2.1 | Testing kits should be stored between 2'C and 30'C.   | Uniform cupboard  | DA       | 25.01.2021         |
|  | 2.2 | Storage areas should be lockable and access restricted to authorised personnel only.  | Actioned  | ALL      | 25.01.2021         |
|  | 2.3 | Checks of supplies should be regularly undertaken to ensure there are adequate supplies of all relevant materials for the testing to be undertaken and stocks re-ordered as required.   | Noted and diaried   | DA       | From 01.02.2021    |
|  | 3.1 | The tests should be offered to all staff. Staff are expected to sign for the receipt of their test kits.  | Noted   | RH / DA  | 25.01.2021 amended |
|  | 3.2 | If you have regular contracted staff, therapists, volunteers on site e.g. cleaners and caterers, peripatetic teachers etc you could include them in your testing offer if the amount of kits you have been provided with allows for this. This would need to be done in consultation with the contractors / managers and test results would need to be shared between both parties. Those persons would be expected to follow the same procedures as your own staff.  | Noted   |          | 25.01.2021         |
|  | 3.3 | All staff consenting to testing should test twice a week as the tests work best when there is a high viral load. This will apply to part time and full time staff.  | Noted   |          | 25.01.2021         |
| PT 3. Issuing tests  |     | It is recommended staff are given time slots for the collection of their test kits to avoid staff   |   |          |                    |
|  | 3.4 | congregating in the area. You may wish to allocate a member of staff to deliver the testing kits to staff in where they are based. Staff distributing / collecting test kits must hand sanitise before / after handling kits.   |   | DA /RH   | From 01.02.2021    |
|  | 3.5 | When issuing test kits the issuer must complete the test kit log - see record keeping below.  | Noted   | DA / RH  | From 01.02.2021    |
|  | 3.6 | Test kits should be issued with the most up to date Instructions for Use leaflet (at this current time test kits may not have the most up to instructions included). It is recommended staff are also sent a copy of this electronically and it is placed on the schools internal system (if there is one) so staff can still access the instructions if they loose the leaflet.  | Leafelt is availableInform staff re staff meeting / al  | sDA / RH | From 01.02.2021    |
|  | 4.1 | Tests should be taken twice a week at intervals of 3 or 4 days apart e.g. Sunday and Wednesday or Thursday. Consider identifying set days for staff to undertake their tests. It is recommended one of the days is the first day they are in school each week / the day before. This may mean the same set day for all staff or different set days depending on the working patterns of staff.  | Sunday evening and Wednesday evening<br>Some alteration for specific work patterns (IW /<br>KM)<br>Inform via training sessions | DA / RH  | From 01.02.2021    |
|  | 4.2 | Consider the time consenting staff will take the test. This may be : a) in the morning to minimise the chance of being exposed to Coved after taking the test or (b) late afternoon / evening to enable time for the school to take action to manage absences in the event of a positive LFT and for staff to have the time to re-take a test if they get void results.   | Late evening  |          |                    |
| PT 4. Conducting the Tests   | 4.3 | Staff and pupils that have had a positive PCR test in the last 90 days are now advised to take part in twice weekly LFD tests within the 90 day period after the PCR test but should not re-<br>commence taking part until day 28. Staff and pupils that have had the Covid-19 vaccine can still take part in the LFT programme. Due to the Omicron varient staff and pupils who who have had a positive PCR test in the last 90 days are now advised to take part in daily testing if required as a close contact. | Amended / noted / shared with staff via email   | HT       | 24.01.22           |
|  | 4.4 | The LFD test kits should be stored between 2'C and 30'C. However the devices and reagents must be used between 15 °C and 30 °C during use so if they are stored somewhere colder than 15 °C they should be moved to a room temperature area for around 30 minutes before use.   | Inform staff at briefing  | DA /RH   | From 01.02.2021    |
|  | 4.5 | There are a number of different types of tests available / in circulation now. Staff and pupils should follow the relevant guidance that comes with the test kit they are using at the time including the safety instructions.  | Amended   | DA /RH   | From 01.02.2021    |
|  | 4.6 | If a test result is Inconclusive / Void the individual should take another LFT as soon as possible using a new test kit but not reusing anything from the first kit. If both tests are void the member of staff should arrange to have a PCR test.  | Inform staff at briefing  | DA /RH   | From 01.02.2021    |

| Γ   |          | The testing solution is not toxic in the quantities provided and any spillages should be cleaned  | Amended / noted / shared with staff via email |         |                      |
|---|----------|---|---|---------|----------------------|
|   | 4.7      | with a paper towel. If the solution included the throat and nose sample, the area should be   |   |         |                      |
|   |          | appropriately disinfected using household disinfectant.   |   | DA /RH  | 08/02/2021           |
| -   |          | As soon as possible after a positive or negative result staff should upload their results to the  |   |         | 00,02,2021           |
|   | 4.8      | NHS online at www.gov.uk/report-covid19-result or by contacting 119. They must also inform  |   |         |                      |
|   |          | the school via the identified route / at the identified time.   | Inform staff at briefing                      | DA /RH  | From 01.02.2021      |
|   |          | Staff should report any issues with testing to the school e.g. unable to take the test, missing /   |   |         |                      |
|   | 4.9      | broken / damaged items, unable to log results with NHS, void results. The school can monitor  |   |         |                      |
|   |          | and / or then raise this with DfE helpline or 119 as identified in the How to Guide page 17.  |   |         |                      |
