

Y6 Science - EVOLUTION AND INHERITANCE

How long ago did humans become humans?

Biology

Week 1

CHANGES OVER
TIME

**LO: Understand how
fossils are made and
what they tell us
about the world.**

Week 2

CHANGES OVER TIME

LO: To describe the process
of natural selection

OFFSPRING

LO: To identify ways in
which living things of the
same kind vary and to
begin to think about why
these variations exist

Week 3

OFFSPRING

LO: To recognise
how organisms
can be bred to
select particular
characteristics in
their offspring

Week 4
ADAPTION

LO: To explore
ways in which
living things are
adapted to suit
the environments
in which they live
and to help them
survive

Week 5

EXTINCTION

LO: I can use
examples to describe
how some living
things became
extinct.

Week 6

ADAPTATION

LO: identify how
animals and plants
are adapted to suit
their environment in
different ways and
that adaptation may
lead to evolution

• What will we be learning about over the coming weeks?
